

# PROFF WOODCARE OIL REFRESHER

[www.proffwoodcare.com](http://www.proffwoodcare.com)

## AREAS OF APPLICATION:

Proff Woodcare Oil Refresher is used for the regular cleaning and re-oiling of all oiled and oil/waxed floors. Oil Refresher is used for natural oiled and waxed floors in dark wood species or colour oiled wood floors. White Oil Refresher is used for white oiled and waxed floors ensuring a stable white colour.

## APPLICATION OF MATERIAL:

Proff Woodcare Oil Refresher is a highly efficient and mild agent for re-oiling and cleaning of oiled and oil/waxed floors. Mix as stated on label on bottle and use two buckets – one with refresher solution and one with rinsing water. Use mop or cotton cloths for operation.

## FINISH:

Proff Woodcare Oil Refresher is combining the cleaning with re-oiling in one product for the advantage of the end user. The ultimate product for cleaning and maintaining of oiled and oil/waxed wood floors. Even neglected surfaces can be restored and look beautiful again with this soap. It extends the periods of re-oiling with Proff Woodcare Maintenance Oil and thereby prolonging the oiled surface and making it more wear resistant.

- \* Ensures that light wood species remain light
- \* Use as often as necessary to maintain the wood in good condition
- \* Suitable for all light and dark oiled wood species
- \* Contain only natural components and is VOC free

- **In natural and white**
- **Cleans and re-oils in one operation**
- **Leaves an invisible oil film on the oiled or oil/wax wood**
- **Ensures healthy living environment**

## HOW TO DO

**Proff Woodcare Oil Refresher** is an alternative to Proff Woodcare Wood Floor Soap. The advantage is cleaning and re-oiling at the same time. Oil Refresher is available in natural and white. Natural is used for clear and colour oiled floors and white for white oiled floors. Oil Refresher leaves an invisible coat of oil on surface and in the grain protecting the oiled surface of the floor. Oil Refresher may be used on all oiled and oil/waxed floors.

### **Work Instruction:**

1. Shake the Oil Refresher bottle well before use.
2. Pour 250 ml of Oil Refresher into 5 litre of lukewarm water. Use two buckets: 1 with Oil Refresher solution and 1 with rinsing water. For UV oiled floor, use only 125 ml in 5 litre of lukewarm water. Use minimum quantity of Oil Refresher water on the floor. Leave Oil Refresher solution long enough on floor in order to dissolve dirt on floor. Remove dirty Oil Refresher water from floor with mop and rinse mop in bucket with rinsing water.
3. Always wipe floor after removal of dirty Oil Refresher water with hard Oil Refresher wrung mop. Always work lengthwise of the floor boards. Make sure that no puddles of water are left on the floor.
4. If the floor has been neglected and is extremely dirty, a floor machine with white pad may be used for dissolution of dirt. Removal of dirty water from floor and wiping with Oil Refresher water is done as under point 3.
5. Leave the floor to dry for about 4 hours at 18 degrees Celsius.
6. If a slight gloss is requested, buff the floor with white polishing pad under floor machine after drying.

Disposal: Empty containers and product residue disposed of according to regional rules and regulations.
